

## Computer Science Education Week

### Coding in Minecraft Student Competition

#### Theme:

Computer Science is EVERYWHERE!

#### Team Formation:

Students can work individually or in pairs.

#### Project Requirements:

**Build:** Create a basic structure in Minecraft Education that represents somewhere you have seen Computer Science in your daily life.

**Code:** Use Code Builder inside Minecraft Education to aide in the building process. Your build must have been partially created through code!

**Submission:** Submit your MakeCode file as well as a picture or video of your build to the Coding in Minecraft Portal. When submitting, put the student name(s), school name, and school district in the message section before hitting submit!

#### Judging Criteria:

**Creativity:** Originality in design.

**Functionality:** Effective use of coding.

**Relevance:** Clear connection to computer science.

#### Prizes:

The winning student(s) will win Coding in Minecraft Swag for their **whole class!**
