INTRODUCTION

Objectives

This volume is the State of Alaska Department of Education and Early Development's recommended Uniform Chart of Accounts for Alaska School Districts (Chart of Accounts).

The standardized structure has been developed to accomplish the following objectives:

- Establish a uniform minimum chart of accounts statewide to improve financial data collection, reporting, transmission, accuracy, and comparability.
- Ensure that school districts comply with Generally Accepted Accounting Principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB).
- Ensure that school districts comply with all Alaska statutes and regulations.
- Provide better information for use by administrators, parents, board members, legislators, and others interested in school finance.
- Establish the minimum standard for the State of Alaska Department of Education and Early Development financial reporting requirements.

Background

The 2018 Edition of the Chart of Accounts (effective July 1, 2018) is in response to ongoing needs for Alaska school finance reporting data. This revision clarifies and updates the 2014 edition, including amendments which will provide additional account codes and descriptions for technology related expenditures and account code and description changes related to GASB statements.

Organization of the Manual

This manual contains the following information:

Introduction

The introduction provides the reader with the objectives of the Chart of Accounts and additional background information.

Account Code Structure

This section explains the coding elements and arrangement of the account code and provides guidelines and instructions to help the user understand the account coding system. Also included here is a discussion and explanation of required codes.

ACCOUNT CODE STRUCTURE

The account code structure consists of three required and two optional elements as illustrated below. The specific digits and arrangement of code elements internally within a school accounting system may vary from that presented below; however, the Chart of Accounts requires a minimum accounting and reporting of transactions as indicated by required coding.

Account Code Elements

1. **Fund** - A fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities, and residual equities or balances, and changes therein, which are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions, or limitations. **(Required for all transactions)**
2. **School/Location** - Identifies an attendance center, program unit, physical location, or department within the district. **(Optional)**
3. **Function** - An activity or group of activities within a fund whose purpose is to provide services to accomplish a certain objective or end. Examples are: Instruction and Support Services - Students. **(Required for Expenditures)**
4. **Program/Project** - Identifies a plan of activities and procedures, which are designed to accomplish predetermined objectives. Examples are: English Literature and Mechanical Drawing. **(Optional)**
5. **Object** - Identifies the type of revenue, expenditure, or balance sheet account as follows: **(Required for all transactions)**
 - A. **Revenue Objects** - Identifies sources of revenues received. Examples are: Earnings on Investments and Revenues from State Sources.
 - B. **Expenditure Objects** - Identifies the type of service or commodity received as the result of resources expended. Examples are: Certificated Salaries, Utilities, and Staff Travel.
 - C. **Balance Sheet/Statement of Net Position Objects** - Identifies the type of items owned, owed and fund balances. Examples are: Cash, Accounts Receivable, Accounts Payable, and Restricted Fund Balance/Restricted Net Position.

These elements should contain at least three digits to identify the accounts. The total number of digits in the recommended code structure is fifteen (15) as indicated by the Guidelines for Using Account Codes.

Guidelines for Using Account Codes

Some guidelines to assist you in using the account code are:

1. When a financial transaction occurs, first determine what account type(s) are affected (revenues, expenditures and/or balance sheet accounts).
2. Once the account type(s) have been determined, identify which code elements should be used. At a minimum, the required elements must be used (i.e., fund, function, object) although the school districts may also use the optional elements (program and school/location).
3. After determining the code elements, refer to the Chart of Accounts for the account code that matches the object element then proceed up from the most specific code (object) to the fund account. For example, a school makes an expenditure for athletic equipment purchased to use in physical education classes at a high school, the recommended code structure would be:
 - A. If a school district uses only the required code structure, the following would be the transaction:

	FUND	FUNCTION	OBJECT
	↓	↓	↓
EXAMPLE:	100	100	450

School Operating Fund, Instruction, Supplies and Materials.

- B. If a school district chooses to use the optional account codes for further details, the following would be the transaction:

	FUND	SCHOOL	FUNCTION	PROGRAM	OBJECT
	↓	↓	↓	↓	↓
EXAMPLE:	100	031	100	011	450

School Operating Fund, High School, Instruction, Physical Education, Supplies and Materials.

Start with what kind of expenditure (Supplies and Materials), where was the expenditure used (Physical Education Class in Instruction), what school/location (High School), and last what resource is paying for the expenditure (Operating Fund).

Required and Optional Account Coding

The Chart of Accounts indicates which account classifications are required (if applicable) and which are optional by designating each account as "O" or "R." The meaning of each designation follows:

O = Optional
 R = Required

The table below summarizes the required and optional code elements for each account type.

	FUND	SCHOOL	FUNCTION	PROGRAM	OBJECT
Revenue Accounts	Required	Optional	Optional	Optional	Required
Expenditure Accounts	Required	Optional	Required	Optional	Required
Balance Sheet Accounts	Required	Optional	Optional	Optional	Required

Federal and State grant requirements could dictate additional required account elements and codes other than those outlined in the Chart of Accounts.

The minimum required codes are highlighted in **bold** throughout the Chart of Accounts.

UNIFORM CHART OF ACCOUNTS AND ACCOUNT CODE DESCRIPTIONS

This section details the categories for revenue, expenditure and balance sheet accounts. Since the fund codes apply to all three types of accounts they are described first.

Fund Classifications

A FUND is a fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities, and residual equities or balances, and changes therein, that are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions, or limitations. School districts have the option of establishing a separate fund for each federal or state grant. If multiple grants are recorded in a fund, separate revenue and expenditure accounts must be established for each grant within the fund, and separate revenue and expenditure reports for each grant must appear in the audit report. Project codes are suggested for multiple grant activities within a fund to meet segmented financial transaction information requirements.

Governmental Funds

- 100 GENERAL FUND (SCHOOL OPERATING FUND) - The fund used to account for all operations of the school district not required by law or administrative action to be accounted for in another fund. **(Required)**
- 200 - 399 SPECIAL REVENUE FUNDS - Funds used to account for the proceeds of specific revenue sources (other than trusts or major capital projects) that are legally restricted or committed to expenditure for specified purposes other than debt service or capital projects. (Optional)
- 215 COMMUNITY SCHOOL FUND - The fund used to account for revenues and expenditures for community schools. Revenues include state grants for community education, and local revenue and matching funds from School Operating Fund. **(Required)**

Functions

FUNCTION is used to group within a fund the different broad classifications of financial activities or services performed; for example, Instruction is function 100, a broad group of activities and services performed. Functions provide for the reporting of financial information in a manner, that is useful to school boards, superintendents, the Department of Education and Early Development, the Legislature and in some instances provides for the accumulation of expenditures in such a manner as to show compliance with law or regulation.

For school districts that wish to accumulate financial information in greater detail than the required function level many required functions are further subdivided into optional functions. Optional functions provide for the grouping of activities or services in further detail; for example, Instruction 100 is a required function but could be further broken out into the optional function Correspondence Instruction 120. The optional functions are components of the required functions and if optional functions are used, then they should be aggregated and reported at the required function level. When establishing coding for required functions the explanations and detail provided in the optional functions should be considered.

Program and Project Codes

A PROGRAM is a plan of activities and procedures designed to accomplish predetermined objectives. Program codes are assigned at the discretion of the School District.

We suggest that program/project codes be utilized by each individual district to account for activity unique to your district. Program codes may be utilized to provide more detailed information for grant reporting requirements such as public radio or capital project reports. Student group or club transactions may also be segregated with the use of program codes. Although the Uniform Chart of Accounts contains many anticipated object codes, it is recommended that districts use program codes to enhance existing codes for circumstances that cannot be anticipated.

As an example, project codes could be utilized within the Capital Project fund(s) to segregate transaction activity for a project as needed to meet grant reporting standards as an alternative to establishing separate funds for each grant activity.

Project codes could be utilized within the Special Revenue Fund(s) to segregate transaction activity for a particular grant as needed to meet grant reporting standards.

It is suggested that project codes be utilized within the Agency Fund(s) to segregate transaction activity for a student group or club.

- 800 FUND BALANCE - The difference between fund assets and fund liabilities of governmental and similar trust funds. The fund balance definitions are aligned with GASB Statement 54. See Appendix D for specific guidance on calculating the fund balance in accordance with AS 14.17.505 and 4 AAC 09.160.
- 810 NONSPENDABLE FUND BALANCE - Nonspendable fund balance represents the amount of fund balance that cannot be spent because either (a) it is not in spendable form (most commonly evidenced by inventory, prepaid assets, and long-term portions of receivables); or (b) it is legally or contractually required to remain intact (most commonly evidenced by the nonexpendable principal in a permanent fund). There is an enforceable requirement that the money be maintained intact and thus cannot be used. This would include items that are not in cash or not expected to be converted to cash such as inventory, supplies, and prepaid amounts. It may also include the long-term amount of loans and receivables, as well as property acquired for resale and the corpus (principal) of a permanent fund. For example, a donation to the district that stipulates only the interest earnings on that donation can be spent would be considered as a part of "nonspendable" fund balance. **(Required)**

- 820 - 829 COMMITTED FOR (DISTRICT COMMITMENTS) - “Committed” indicates tentative plans for future use of a portion of the fund balance, such as Committed for Construction Projects. (Optional)
- 830 ASSIGNED FUND BALANCE - Assigned fund balance represents *intentional* constraints placed on resources by the governing board or its appointees’ intent to be used for specific purposes, but meet neither the restricted nor the committed forms of constraint. The creation of these constraints does not require formal action, although formal action to enact is not prohibited and formal action is not required to reverse that classification. Also, the assigned fund balance classification is the residual classification for the special revenue, debt service, capital projects, and/or permanent funds after nonspendable, restricted, and committed balances have been identified (unless the residual amount is negative, which would require presentation as unassigned fund balance). This would include encumbrances, Impact Aid advances, and self-insurance. **(Required)**
- 830 - 844 SPECIFIC ASSIGNED FUND BALANCE - This range can be used to identify assigned items under object code 830. (Optional)
- 845 UNASSIGNED FUND BALANCE - The unassigned fund balance classification is the residual classification, for the general fund only, after nonspendable, restricted, committed, and assigned balances have been identified. For the general fund, unassigned fund balance may represent either a positive or negative balance. In funds other than the General Fund, an Unassigned Fund Balance may be used only if their respective residual balances are negative. The unassigned fund balance classification is used for special revenue, debt service, capital projects, or permanent funds *only* if the residual amount of fund balance is negative. It is also used to report the residual amount for all *other* governmental funds after nonspendable, restricted, and committed balances have been identified, if the residual amount is negative. **(Required)**
- 850 NET INVESTMENT IN CAPITAL ASSETS - This account is used to record the component of net position invested in capital assets, net of related debt, that represents total capital assets less accumulated depreciation less debt directly related to capital assets. - 870 UNRESTRICTED NET POSITION - This account is used to record the component of net position that represents net position not classified in accounts 850 and 860. This account is to be used only in proprietary funds and government-wide statements. **(Required)**

APPENDIX D - FUND BALANCE CALCULATION FOR AS 14.17.505 AND 4 AAC 09.160

The fund balance object codes (800 through 845) are aligned with GASB Statement 54, *Fund Balance Reporting and Governmental Fund Type Definitions*, which requires the fund balance for governmental funds to be reported in classifications that clarify the constraints on how resources can be spent.

In accordance with 4 AAC 09.160, all funds in the year-end fund balance of a school district's operating fund are subject to the 10 percent limit described in AS 14.17.505(a), except for the funds in the following six categories:

- 1) Encumbrances;
- 2) Inventory;
- 3) Prepaid expenses, which may include fuel;
- 4) Self-insurance;
- 5) Federal impact aid received
 - (a) in response to the application for impact aid submitted in the fiscal year that immediately preceded the current fiscal year; and
 - (b) on or after March 1 of the current fiscal year that was awarded as a result of applications that were submitted before the application for impact aid for the current fiscal year; and
- 6) Unexpended annual student allotment money as provided under AS 14.03.320(c).

For the purposes of AS 14.17.505(a), the "unreserved portion of the year-end fund balance of a school operating fund" is the portion of the fund balance remaining after the deduction of the above six categories.
