

## Reporting Plan for the 2020-2021 Alaska School, District, and State Report Cards

In June of 2021, US ED approved Alaska's accountability system waiver request. Although assessments were administered this Spring, several sections on Alaska's Report Card contain measures that use assessment data that will not be available or may be substantially limited this year. The tables below outline the data that will be reported publicly on the website and the data that will likely be accompanied with additional documentation.

### Document Key

	The data are available.
	The data are largely available and will be accompanied with additional documentation.
	The data are not available.
